Budapest, 28 April 2006

Allround's T-Com project nominated for World Billing Awards 2006

Allround has further secured its growth in the revenue assurance market with its recent **joint nomination with T-Com, Hungary for the World Billing Awards 2006 Best Revenue Assurance/Management Project.**

Revenue Assurance is a hot topic with telecom operators and once the need is identified the project needs to be completed on time on budget and prove its worth quickly.

This is exactly what was delivered by Allround meeting budget implementation and increasing efficiency with great success. Allround's flagship product, **CeDaR**, the **world's first billing system testing solution independently approved by** the British Approvals Board for Telecommunications (**BABT**) was selected for the project.

Implementation took place during the last quarter of 2005 and the **project is now producing amazing results** with efficiency of the testing process improving significantly, giving T-Com **30% savings on manual work.**

About T-Com, Hungary

Magyar Telekom is the principal provider of telecom services in Hungary. It provides a broad range of services including telephony, data transmission, value-added services, and through its lines of business is Hungary's largest wireline operator and mobile carrier and leading internet service provider. Magyar Telekom also holds a majority stake in MakTel, the largest telecom operator of Macedonia and in Telekom Montenegro, Montenegro's largest telecom operator.

The basis of Magyar Telekom Group's operation is a holding-type management system. The business activities are managed by the Magyar Telekom Group's lines of business:

- **Wireline Services – under T-Com brand:** wireline telecommunications, internet and cable television products and services offered in cooperation with T-Online and T-Kábel to residential customers and small and medium enterprises
- **Mobile Services – under T-Mobile brand:** full range of mobile communications services
- **Business Services – under T-Systems brand:** business communication services and solution offered for key business customers

Meeting in full the communications demand of our residential and business customers, Magyar Telekom operates around 3,7 million fixed lines in Hungary, Macedonia and Montenegro, and also serves more than 5 million mobile phone customers and nearly 400 thousand internet subscribers. The number of its cable television customers approaches 390 thousand.

Magyar Telekom Group has an ISO 9001:2000 Quality Certificate on Group level from 2002.

About Allround

ALLROUND puts telecom operators in control with applications for Billing System Testing, CDR Handling and Analysis, TAP Conversion, Roaming Management, Fraud Detection, and Revenue Management. The cornerstone to ALLROUND's applications is advanced technology and know-how in the area of CDR and TAP handling - editing, filtering, comparison, compilation, analysis and fixing.

T . . . Com . . .

ALLROUND is an ISO 9001:2000 certified, profitable, private European company with a global customer base. The company is an Associate Member of GSM Association since April 2002. British Approval Board for Telecommunications (BABT) has awarded CeDaR the first BABT Certificate of Attestation against its Code of Practice for the design and supply of communication support system.

At the Hungarian Innovation Award 2005 Allround was granted a certificate for achieving significant revenue from development and sales of innovative products.
