

## TAP3.10 To XML Converter

### Description

TAP3.10 To XML Converter converts a TAP3.10 format CDR file to XML format.

### Benefits

With the help of this utility the contents of a TAP3.10 format file can be converted to a widely readable format. This simplifies the search for subscriber specific information and the contents of the file can be overviewed easily without an ASN.1 reader. The file converted to XML format can also be used as a basis for further processing.

Further benefits:

- Easy integration to your existing IT environment
- Easy operation and management via SNMP (from e.g. HP OpenView)
- Low operational costs
- Full scale logging

### Application example

Sometimes it becomes necessary to find a specific CDR (or group of CDRs) in a large TAP3.10 file and extract the contents of the matching records for reviewing or further processing. This utility can do the second part of this task by converting CDR records to a widely accepted and readable format. Using this utility combined with the TAP3 Record Filter (to accomplish the filtering part of the task) gives a fast and reliable solution for the whole range of possible tasks.
