

TADIG #59 plenary in Budapest hosted by ALLROUND

Budapest, Hungary 23 May 2005

Between 10-12 May, the TADIG working group of the GSM Association held its 59th plenary meeting in Budapest. ALLROUND was the proud host of the event, responsible for selecting the venue, providing various technical facilities and offering evening entertainment programs.

TADIG (Transferred Account Data Interchange Group) is responsible for defining data interchange procedures. Its main focus is billing, including TAP, the Rejects & Returns Process, TAP Testing and the requirements for the TTT (TAP Testing Toolkit). The working group has more than 250 members. 78 of them have actually attended the meeting producing the highest turnout of recent TADIG plenaries.

The importance of the event was underlined by the support of prominent sponsors. The two leading Hungarian mobile operators, T-Mobile Hungary and Pannon GSM sponsored different parts of the meeting, while the Hungarian Investment and Trade Development agency set up a stand and represented a selection of Hungarian software companies working in the mobile industry.

In an interview with Mr. Christer Gullstrand, the chairman of TADIG claimed that „I think – from a business perspective – it was a very good meeting, and we managed to do what we set out to do, so I’m very happy.” On ALLROUND’s performance he added „thanks a lot for agreeing to host, it was very appreciated by everyone and very appreciated by myself.” The interview in full length will appear in the next issue of our quarterly newsletter CeDaR News.

ALLROUND puts mobile operators in control with applications for CDR Handling and Analysis, TAP Conversion, Roaming Management, Testing, Revenue Management, and Fraud Detection. With the flexibility and responsiveness of its solutions ALLROUND enables mobile operators to bridge the gap between their business needs and technical requirements.

ALLROUND is an ISO 9001:2000 certified Hungarian company founded in 1991, which specializes in software development and consulting. It has been a Microsoft Certified Solution Provider since 1995, an Oracle Alliance Partner since 1997 and became an Oracle Certified Solution Partner in 1999. Admitted as a Member of the Sun iForce (SM) Partner Program in 2001, ALLROUND joined HP’s Developer & Solution Partner Program in May 2004. ALLROUND entered the GSM Association as an Associate Member in April 2002, listed under the categories of Security Systems Supplier and GSMA Standards Supporter. Besides its Hungarian mobile operator partners, the company has client references in Europe, North America, the Middle East and Africa.
